<b><i>Emptying bunds</i></b>			

## **1. Introduction**

1.1. This SOP for Future Pigs Ltd (P0420-03) pertains to the maintenance of bunds.

## **2. Purpose**

2.1. To ensure the liquid content of the bunds are disposed of correctly.

## **3. Scope**

3.1. This procedure applies to Staff and Contractors emptying the bunds.

## **5. Responsibilities**

5.1. The Environmental manager is responsible for ensuring the maintenance of the bunds.

## **6. Protocol**

6.1 The environmental manager observes the liquid level of each bund during the weekly check.

6.2 If there is liquid within the bund a sample is taken, and the pH is checked in the lab.

6.3 Rainwater is feedback into the system through intake 3.

6.4 A forklift driver collects the mobile bund and empties the liquid content into intake 3.

For stationary bunds an external contractor sucks out the rainwater and empties into intake 3.

6.5 If the liquid is not rainwater, a sample is taken to an external lab for analysis.

6.6 The material is then disposed of using a third party.
