

19th December 2025

Please regard this as Drehid Waste Management Facilities response to the notification received from the Agency on 18th December 2025 titled “Waste Recovery Quantities 2026”. The Agency has requested a submission from the Drehid Facility regarding planned quantities of waste (tonnes) to be accepted for recovery at the landfill in calendar year 2026.

The below waste types and volumes are planned for acceptance in January and February 2026 in Phases 13/14/15 in order to facilitate the closure of the landfill, in preparation for final cap. No waste shall be accepted beyond the end of January and February 2026 under the existing licence W0201-03.

Recovery Use	Waste Type	LoW code	Quantity (Tonnes)	To be used within the landfill void (Yes/No)
Surface Regulation and Profiling	Inert C&D Fines	19 12 12	5000	Yes
Hard Stand Areas and Haul Routes	Construction Rubble	17 01 01 17 09 04 19 12 09 19 12 12	2500	Yes
Hard Stand Areas and Haul Routes	Woodchip	19 12 07	1000	Yes
Surface Regulation and Profiling	Inert soil and stones	17 05 04	9000	Yes

It is planned that an additional 800 tonnes of waste shall be accepted for disposal and used for surface regulation and profiling purposes. This will be carried out on a case by case basis in order to fill the remaining void in Phase 15 and not set up as a daily intake.

Yours Sincerely,

Phoebe Dillane

Environmental Compliance Officer
