20th July 2023

Re: SV27044

Dear Mr Ó Seasnáin,

I refer to site visit report SV27044, following on from your visit on the 30th May 2023. The following response details actions based on your observations on the day.

I hope the information is to your satisfaction and should you require any additional information, please don't hesitate in contacting me.

Yours Sincerely,

A handwritten signature in blue ink that reads 'Eve Howard'. Below the signature is a solid horizontal line.

Eve Howard

SV27044 Observations and Responses

- 1. The licensee shall submit the SOPs for kiln operation to the Agency by licensee return or make them available to inspect by the Agency in some other form.*

All SOP's are present and in use for the operation of the kiln with solid recovered fuel. The procedures were in place at the time of the visit. These procedures are available to the agency at any time of their choosing. However, due to the commercially sensitive nature of these procedures which detail site specific operations, it is preferred that these are not shared publicly. ICL can share these SOP's with the agency in person, via a Microsoft Teams call or by any means as requested by the Agency where the documents are kept confidential.

- 2. Clarify that Ed Murphy is authorised to collect and transport SRF to the installation in accordance with National and European legislation and protocols.*

In reference to your comment on the waste collection permit (WCP) not showing a code for SRF or similar on the day of the audit, Ed Murphy Haulage had a similar waste code to SRF in the form of 19 12 12 which is described as other wastes (including mixtures of materials) from mechanical treatment of wastes other than those mentioned in 19 12 11.

Ed Murphy Haulage is now also permitted to transport combustible waste (refuse derived fuel) 19 12 10.
